Why Take This workshop?

Domain

- This workshop is designed for students who are new to virtual reality and want to learn about the principles of VR technology.

- By the end of this workshop, you will have created and deployed a VR application. You will understand the physical principles of VR, and you will use that knowledge to create a comfortable, high-performance VR application using Unity.

Prerequisites and Requirements

- No programming experience is required.
- Access a computer running Mac OS X (10.8+) or Windows (7, 8, or 10).
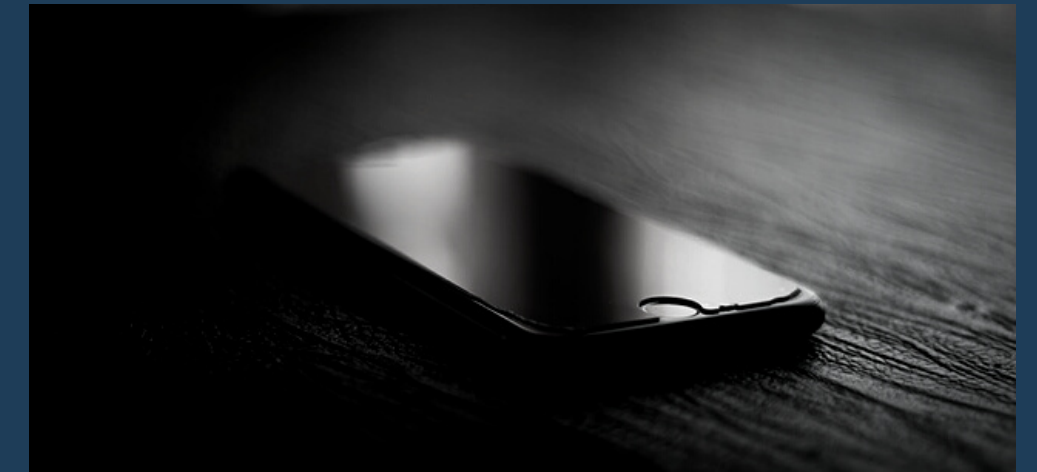

SELECTION PROCESS

VIDEO

A video of at most 10 minutes would be shot, featuring the heads of all domains of GDSC.

CONTENT

The video will mainly comprise the details of the upcoming online quiz and the website references to study for the quiz, as mentioned earlier

IMPLEMENTATION

The video would then be circulated to all the WhatsApp groups of all sections and the GDSC Instagram page.

ADVERTISEMENT OF THE EVENT

VIDEO

Video circulation on the Whatsapp groups, informing about the selection process.

POSTERS

Create enticing posters using Graphic design for social media and physical use.

SOCIAL MEDIA

The nuances of the event would be covered in GDSC's Instagram story daily.

ANNOUNCEMENTS

An announcement would be made in Boy's and Girl's hostel.

Why take this workshop?

This workshop covers the foundational skills needed to produce professional VR experiences that are comfortable and polished.

VR development is an amazing career, with both demand and salaries rising.

THANK YOU
